

Table Excerpt and Table Excerpt Include Documentation

The **Table Excerpt** and **Table Excerpt Include** macros combine different kinds of table excerption and multi-excerption in one tool:

- excerption within one page
- multi-excerption within multiple pages and spaces searched by:
 - page names
 - page trees
 - labels

The macros improve the performance of pages storing large tables and let you use the original tables for any purpose, including filtering, building multiple charts and pivot tables.
