

Working with Other Macros and Add-ons

Table Filter and Charts for Confluence add-on is compatible with Confluence macros and third-party add-ons that output the table data. All you just need is to paste the macro into Table Filter macro and that's done. See the next pages to see the add-on's compatibility with other macros:

- [Advanced Table Macro Page](#)
- [CSV Macro Page](#)
- [HTML Macro Page](#)
- [JIRA Issues Macro Page](#)
- [JSON Table Macro Page](#)

The add-on is also compatible with the following add-ons:

- [SQL for Confluence \(Pro\)](#).
- [SQL Connector](#)
- [SQL for Confluence \(Express\)](#)

Try the add-on with the [Page Properties Report](#) macro. Apply one or multiple filters to the table data.

Title	Author	Open to Customers	Page Status	Reviewer
JSON Table Macro Page	Andy McCarthy	Yes	IN REVIEW	Peter Jacobs
JIRA Issues Macro Page	Adam Miller	Yes	APPROVED	Peter Jacobs
HTML Macro Page	Adam Miller	Yes	PRE-POSTED	Peter Jacobs
CSV Macro Page	Andy McCarthy	Partially	IN REVIEW	Adam Miller
Advanced Table Macro Page	Adam Miller	Yes	APPROVED	Peter Jacobs
