

# Handy Timestamp and Handy Date

## Handy Timestamp

[Handy Timestamp](#) allows you to insert the current date and time on the page. These values are read-only, so they can be used for tracking different activities, for example for tracking software versions deployed to the staging server. Feel free to add a new Handy Timestamp macro on the page!

### Staging software versions

Timestamp	Build
04.04.2020 11:50	1ed0ba2ec51a
04.04.2020 11:54	v1.3.2
04.04.2020 12:35	ca985097095 (v1.3.2)
	<b>&lt;== Insert Handy Timestamp here!</b>
04.04.2020 12:38	43f8d939dba (v1.3.0)

## Handy Date

[Handy Date](#) is an augmentation for Confluence that allows you to update the dates without opening Confluence editor. Just click the date stamp and pick a new date!

This feature allows you to change dates on pages with **Page Properties** by updating them in **Page Properties Report**.

Component	Update date
Handy Status	20 Feb 2020 <b>&lt;== Click it!</b>
Handy Page Diff	05 Mar 2020
Handy Date	22 Apr 2020

## Try other features

Take advantage of the other macros bundled within Handy Macros app. Click any of the buttons below to check out their capabilities.
