

Managing Look of Filtration Pane

Table Filter macro allows you to regulate width of filter boxes and visibility of the filtration pane on Confluence page.

- [Changing the width of the filter boxes](#)
- [Hiding the filters](#)

Changing the width of the filter boxes

Please note that Table Filter macro allows you to alternate width of filters on the filtration pane. Just hover over the right side of the filter box and drag the edge right or left to increase or decrease width of the box.

While editing the macro you can specify the default width for your filter boxes.

Last Name	First Name	Occupation	City
Doe	John	Developer	London
Fry	Philip	Delivery boy	New York City
Doe	Janet	Scientist	Tokyo
Farnsworth	Hubert	Scientist	New York City
Farnsworth	Cubert	Student	New York City

Hiding the filters

Please note that Table Filter macro allows you to hide or show the filtration pane on the page. Hover over the bottom of the filtration pane and click the collapse ribbon. To expand the filtration pane back, hover over the top of the table and click the expand ribbon.
