# Take Course

Once a participant is enrolled to a course, they receive an email notification with a course link and can follow that link to take a course.

While taking a course, a participant needs to read the learning material and answer questions in quizzes (if a course includes quizzes). When done with a module, a participant clicks **Mark as completed**.

To see a course as a participant:

1. Go to a sample course.
2. Press **Enroll participants** button.
3. Enter your email address in **Participants.**
4. Check your email. When you get an email with a course link, follow it and take a course.

Ask us if you have any questions.
