

View and Review Answers

Viewing Answers

When viewing participant's answers, you can see:

- which questions were answered correctly and wrong
- which questions were not answered
- what answers a participant choose to each question

 On this page:

- [Viewing Answers](#)
- [Reviewing Answers](#)

 Refer to [Documentation](#) to learn more about viewing participant's results.

To view the detailed results of a particular participant, you need to:

- Go to the quiz page (e.g. the [April Fool's Day](#) quiz page)
- In the Quiz Results section on the very bottom of the page, find the record of the participant whose answers you need to view
- Click  in the 'Result' cell
- View answers question-by-question

Reviewing Answers

Answers to single choice, multiple choice and true/false questions are checked automatically. Answers to free text questions need to be reviewed by a quiz author.

 Refer to [Documentation](#) to learn more about reviewing answers to free text questions.

To see how reviewing answers works:

- Take
1. Take a sample quiz with a free text question by clicking the 'Take Quiz' button **quiz**
