A couple of words from our happy customers:

by Kathryn Moye on 2018-08-15

Great plugin! Absolutely essential. Great support too, very responsive. Gives you the filters like Excel that you desperately need.

by Sebastian Tschörner on 2018-07-26

Without this plugin you only have a grid. With this plugin you have a table. The charts are also great. Same for the support. We had a small problem with dateformats in different languagues. They fixed it in few days.

by Serguei Vinokour on 2018-06-11

Absolutely amazing, smart application with real "human native" approach to the interface and data interpretation. Keep going!
