

Working with Other Macros and Apps

Table Filter, Charts & Spreadsheets for Confluence app is compatible with Confluence macros and third-party apps that output the table data. All you just need is to paste the macro into Table Filter macro and that's done.

- [Page Properties Report](#)
- [Jira Issues](#)

Page Properties Report

Try the app with the [Page Properties Report](#) macro. Apply one or multiple filters to the table data. You can also try to add the Pivot Table or Chart from Table macros.

Title	Author	Open to Customers	Page Status	Reviewer
Table Excerpt and Table Excerpt Include Documentation	Adam Miller	Yes	PRE-POSTED	Peter Jacobs
Table Transformer Documentation	Andy McCarthy	Partially	IN REVIEW	Adam Miller
Pivot Table Documentation	Andy McCarthy	Yes	IN REVIEW	Peter Jacobs
Chart from Table Documentation	Adam Miller	Yes	APPROVED	Peter Jacobs
Table Spreadsheet Documentation	Adam Miller	Yes	APPROVED	Peter Jacobs
Table Filter Documentation	Adam Miller	Yes	APPROVED	Peter Jacobs

Or you may turn your Page Properties Report in a spreadsheet to continue working with Excel-like features (just wrap the Page Properties Report in the Spreadsheet from Table macro).

Title	Author	Open to Customers	Page Status	Reviewer
Table Excerpt and Table Excerpt Include Documentation	Adam Miller	Yes	PRE-POSTED	Peter Jacobs
Table Transformer Documentation	Andy McCarthy	Partially	IN REVIEW	Adam Miller
Pivot Table Documentation	Andy McCarthy	Yes	IN REVIEW	Peter Jacobs
Chart from Table Documentation	Adam Miller	Yes	APPROVED	Peter Jacobs
Table Spreadsheet Documentation	Adam Miller	Yes	APPROVED	Peter Jacobs
Table Filter Documentation	Adam Miller	Yes	APPROVED	Peter Jacobs

Jira Issues

Table Filter, Charts & Spreadsheets for Confluence app is compatible with [JIRA Issues](#) macro, which allows you to output the table with JIRA issues. [Here you can find a lot of examples](#) of Jira dashboards that you can build right in Confluence with the help of our macros.
