

# 5 - Adding and removing headings

## Adding headings

You can add new page parts just by clicking the EDIT icon for an existing part. The only thing you need to do further is to type a new paragraph with a heading before or after the part currently being edited.

Try to do this now.

### Click me and add heading after

Type here a new heading and text below it.

#### Test heading

text

#### One more test heading

text

### Click me and add a heading before

## Removing headings

You can remove any part by its opening in InPlace Editor, deleting the whole text and then saving. We have prepared some headings below for you to master your destruction skills 😊.

If you don't see anything below it just only means that somebody has already removed everything and got the 80<sup>th</sup> level of destructor. Trust us, it works! 😊

### Remove me!

text

### Remove me too!

text

### And me please!

text

### Don't forget about me!

text

Please don't remove me 😊
